

# ***Bonjour/Hi, I'm Sanren***

Welcome to my portfolio! I'm an interaction design student at Sheridan College, passionate about creating immersive and innovative user experiences.

Currently looking for a summer internship (May to August), I'm also skilled in graphic and advertising design.

I'd like to show you some of my work, which illustrates my commitment and skills in these areas.  
Browse through my work to discover my creative approach and technical skills.

Bienvenue dans mon portfolio ! Je suis une étudiante en design d'interaction au Sheridan College, passionnée par la création d'expériences utilisateur immersives et innovantes.

Actuellement à la recherche d'un stage d'été (de mai à août), je suis également compétente en graphisme et en conception de publicité.

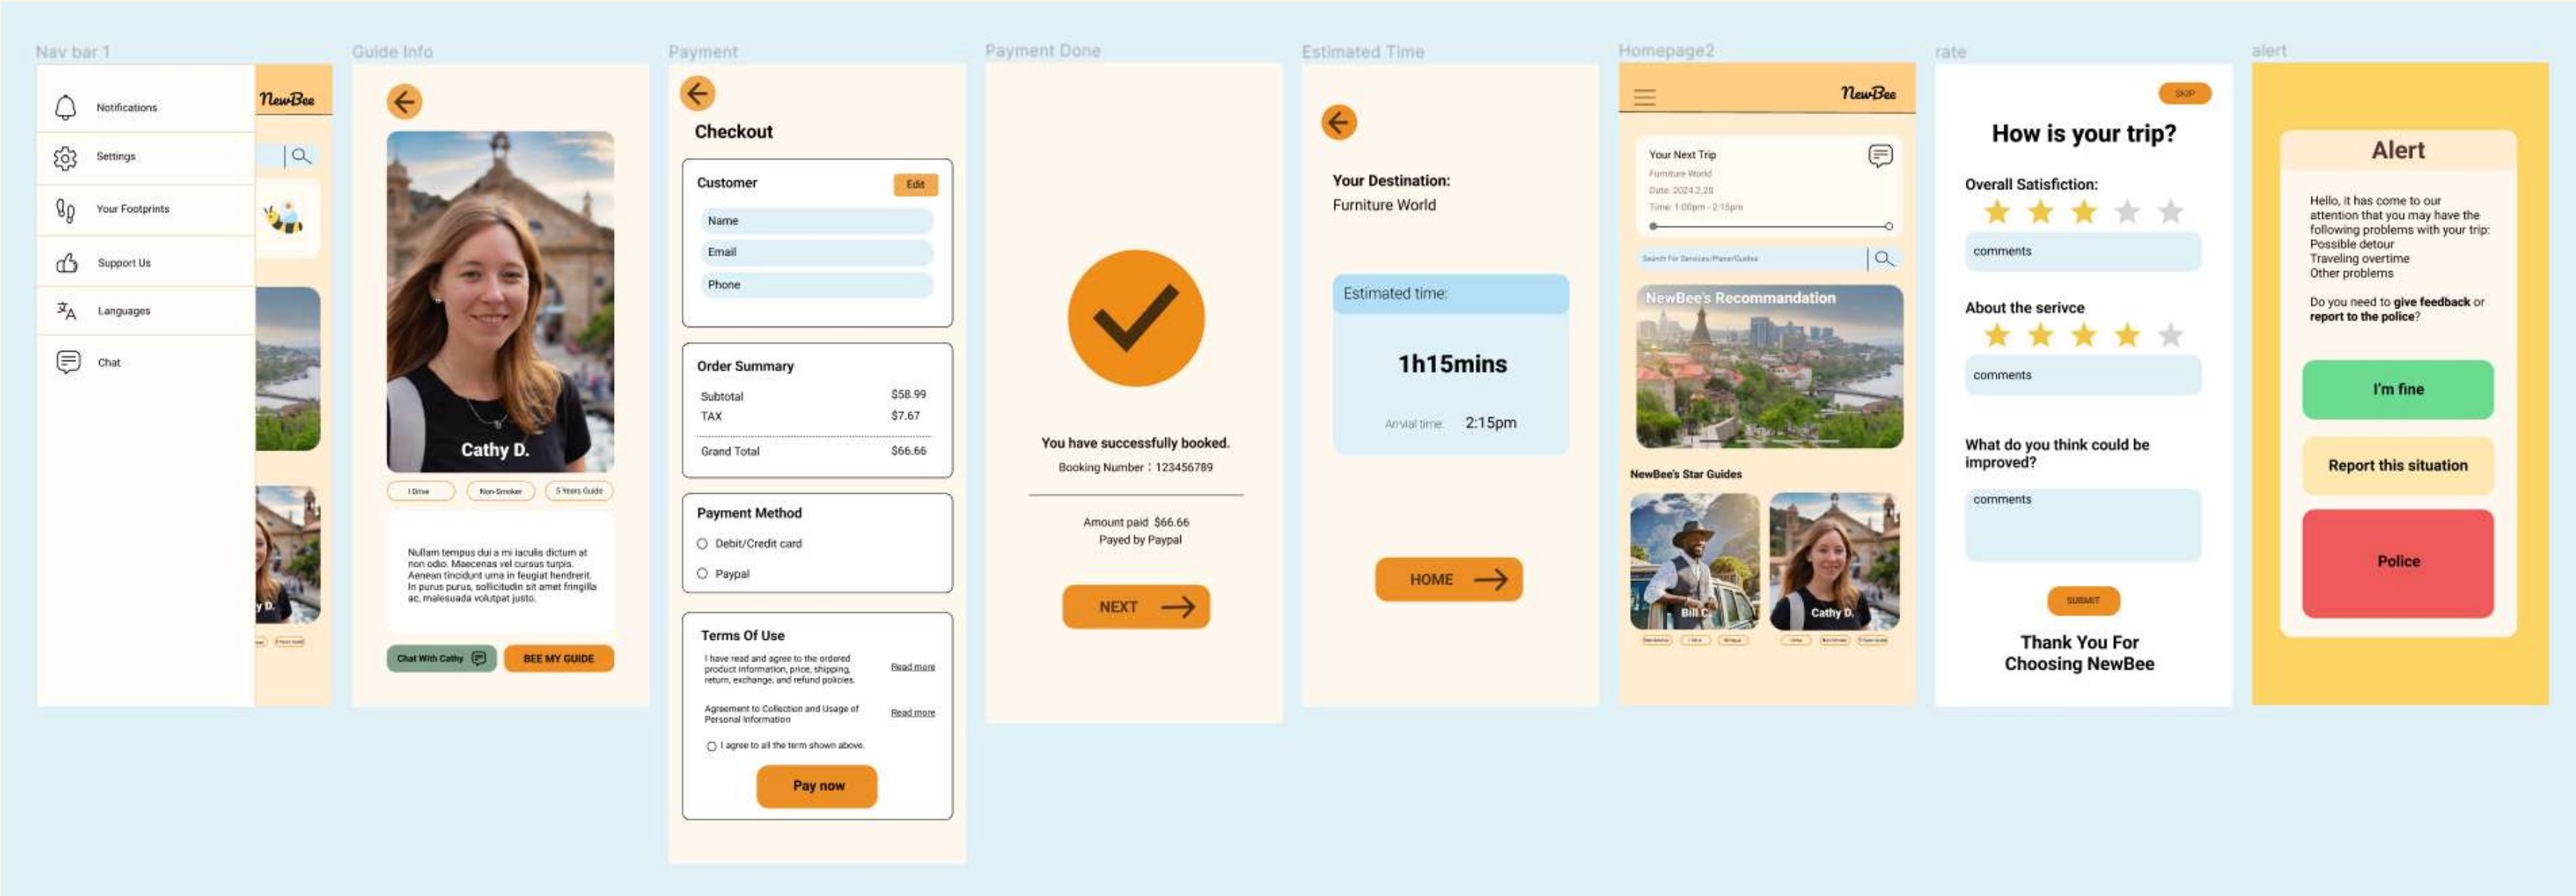

Je vous présente mes réalisations qui illustrent mon engagement et mes compétences dans ces domaines.  
Parcourez mes travaux pour découvrir mon approche créative et mes compétences techniques.

# NewBee Newcomer Guide App

## NewBee Guide du nouvel arrivant

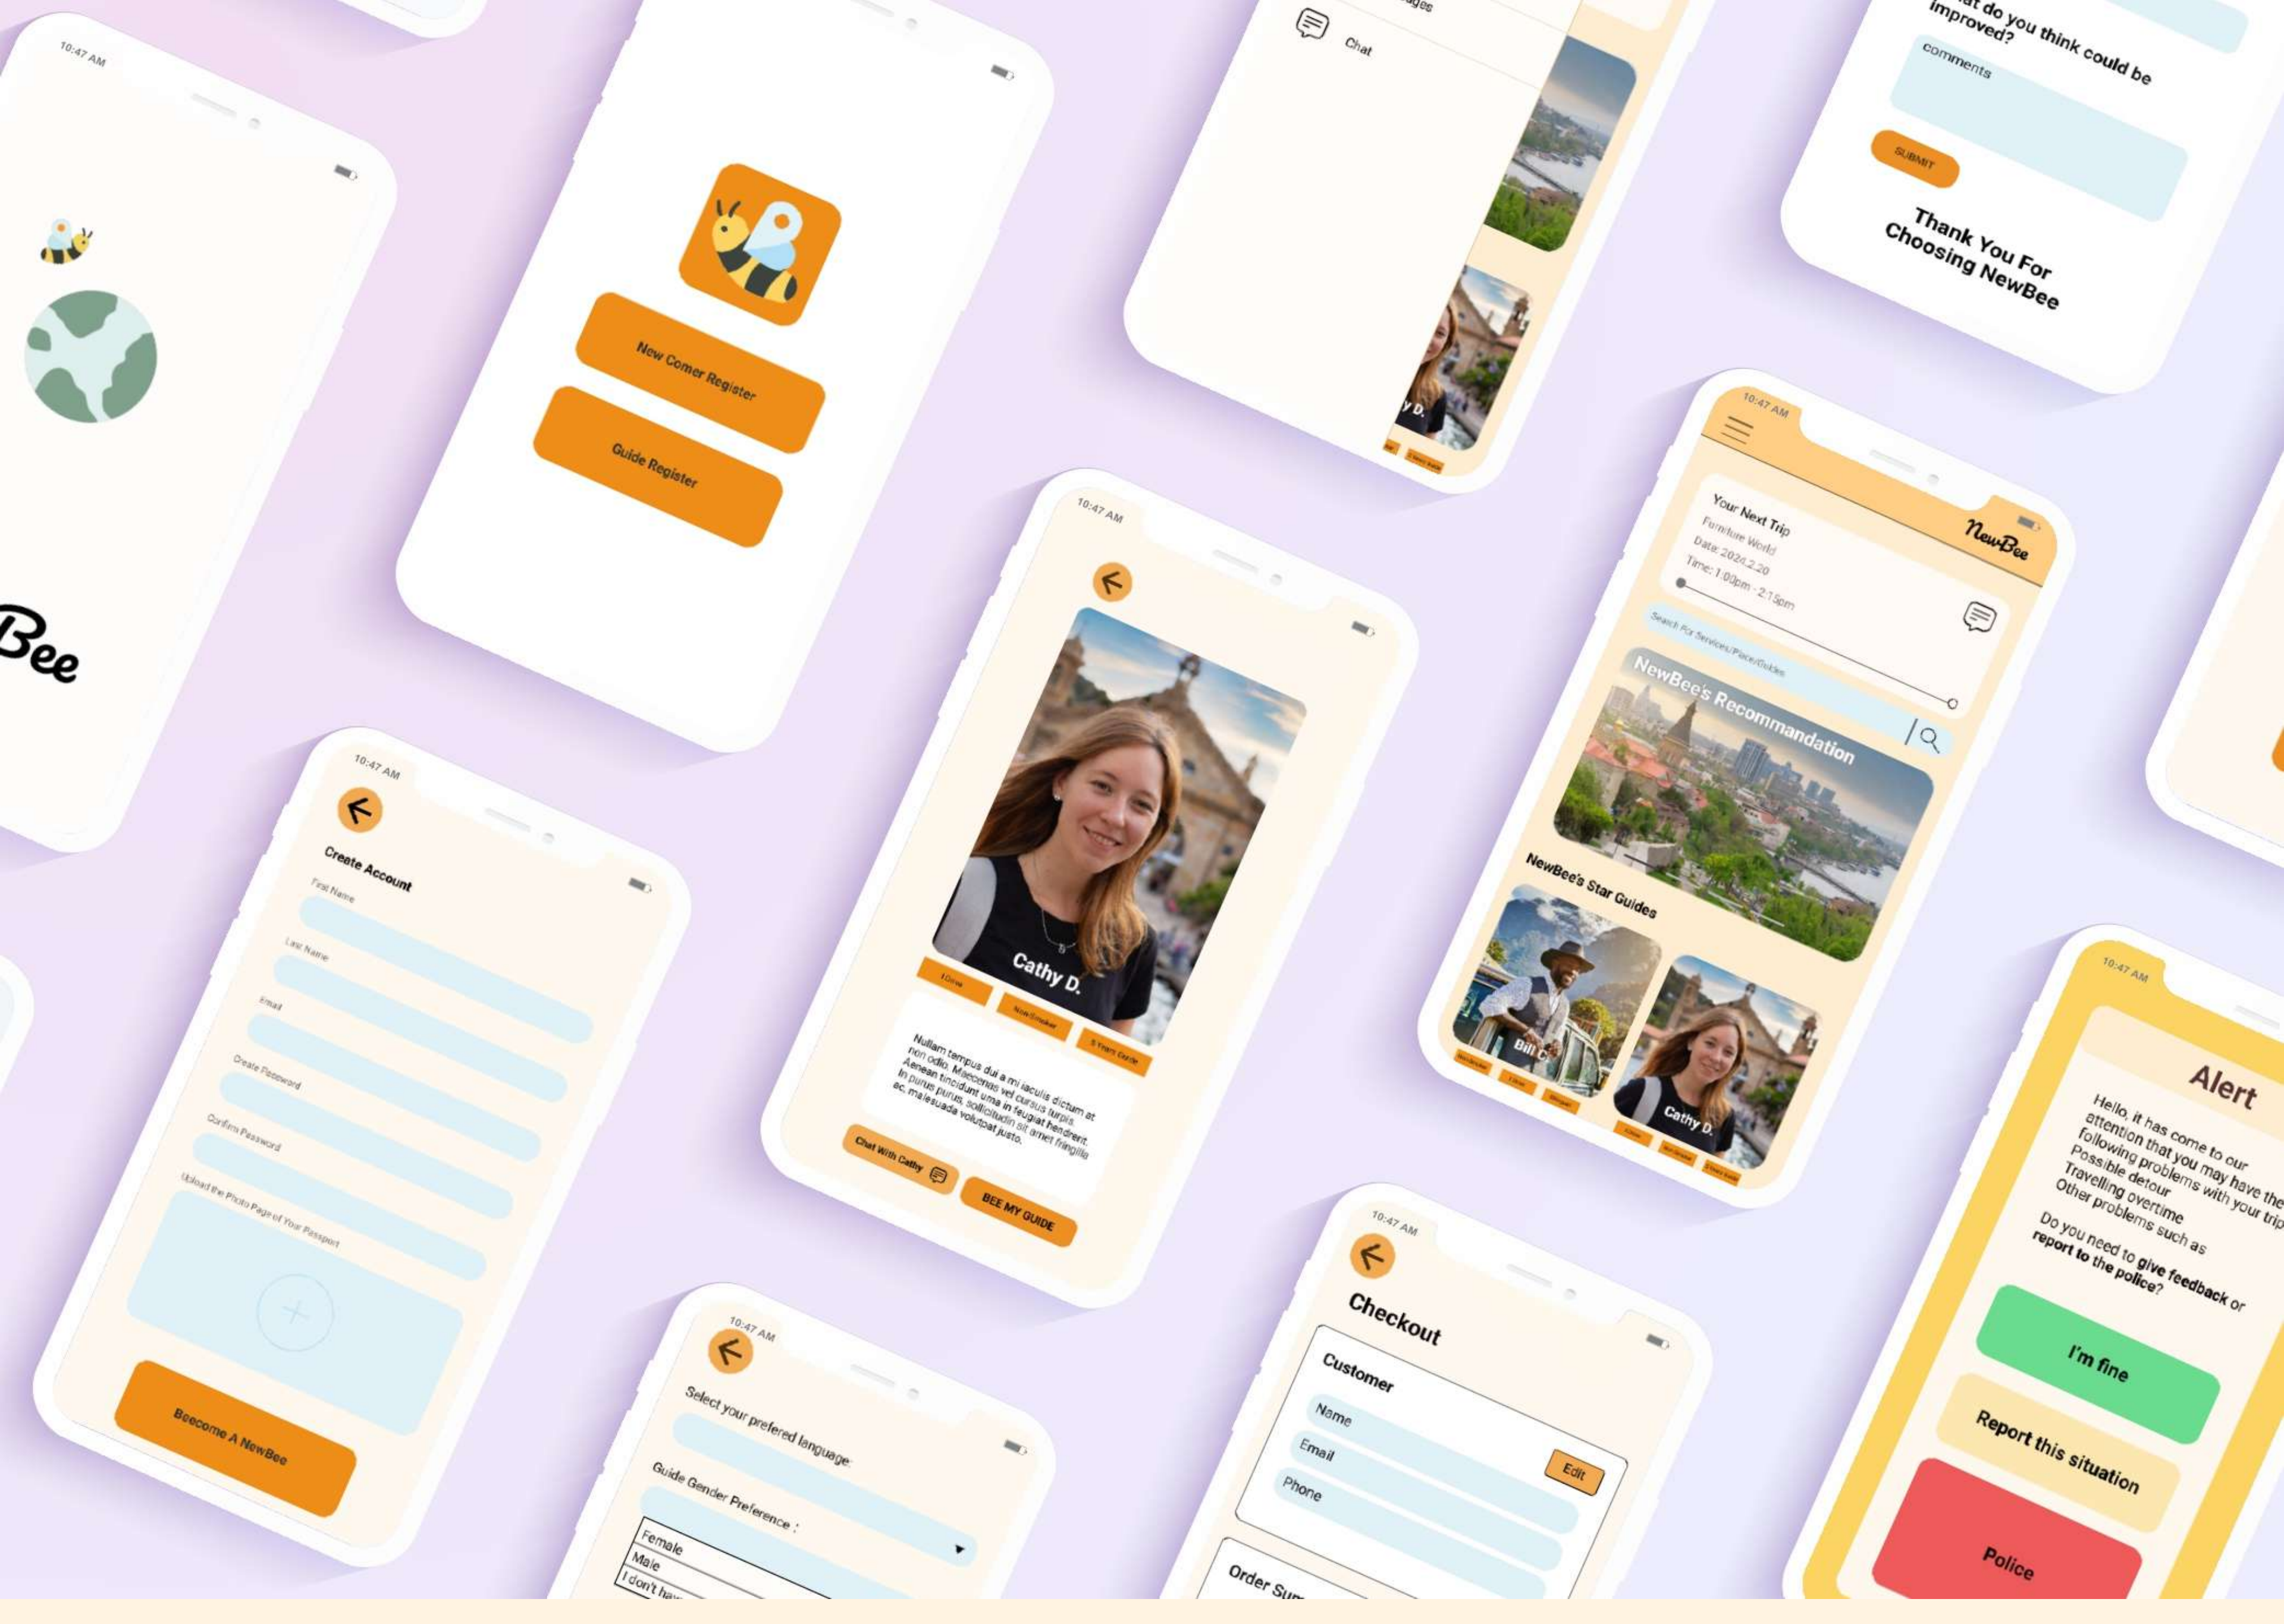

NewBee is a hackathon project aimed at providing a newcomer tour guide service through a mobile app platform. Over the course of two days, I led my team in crafting its conceptual design and user interface. My primary responsibilities included designing the user flow, selecting appropriate fonts, and meticulously refining details within Figma. Additionally, I managed task coordination and time planning to ensure the project's timely completion.

NewBee est un projet de hackathon visant à fournir un service de guide touristique pour les nouveaux arrivants par le biais d'une plateforme d'application mobile. Pendant deux jours, j'ai dirigé mon équipe dans l'élaboration de son design conceptuel et de son interface utilisateur. Mes principales responsabilités comprenaient la conception du flux d'utilisateurs, la sélection des polices de caractères appropriées et l'affinage méticuleux des détails dans Figma. En outre, j'ai géré la coordination des tâches et la planification du temps afin de garantir l'achèvement du projet dans les délais impartis.

Spotlights : Figma (Design system, Components), Mobile design

# Fortune Cookie for Sheridan Bruins

## Un biscuit de fortune pour les Sheridan Bruins

Presenting a customized Fortune Cookie Generator catered specifically for Sheridan Bruins. Within its delightful confections are aphorisms that encapsulate the essence of Sheridan campus life. Designed with a touch of professionalism, this generator offers a unique experience exclusively for those who study or work at Sheridan College. Enjoy the subtle charm of Sheridan's unique culture.

Nous vous présentons un générateur de biscuits Fortune personnalisé, spécialement conçu pour les Sheridan Bruins. Ses délicieuses confections contiennent des aphorismes qui résument l'essence de la vie sur le campus de Sheridan. Conçu avec une touche de professionnalisme, ce générateur offre une expérience unique exclusivement pour ceux qui étudient ou travaillent au Sheridan College. Appréciez le charme subtil de la culture unique de Sheridan.

# Sheridan Vinyl Club Website

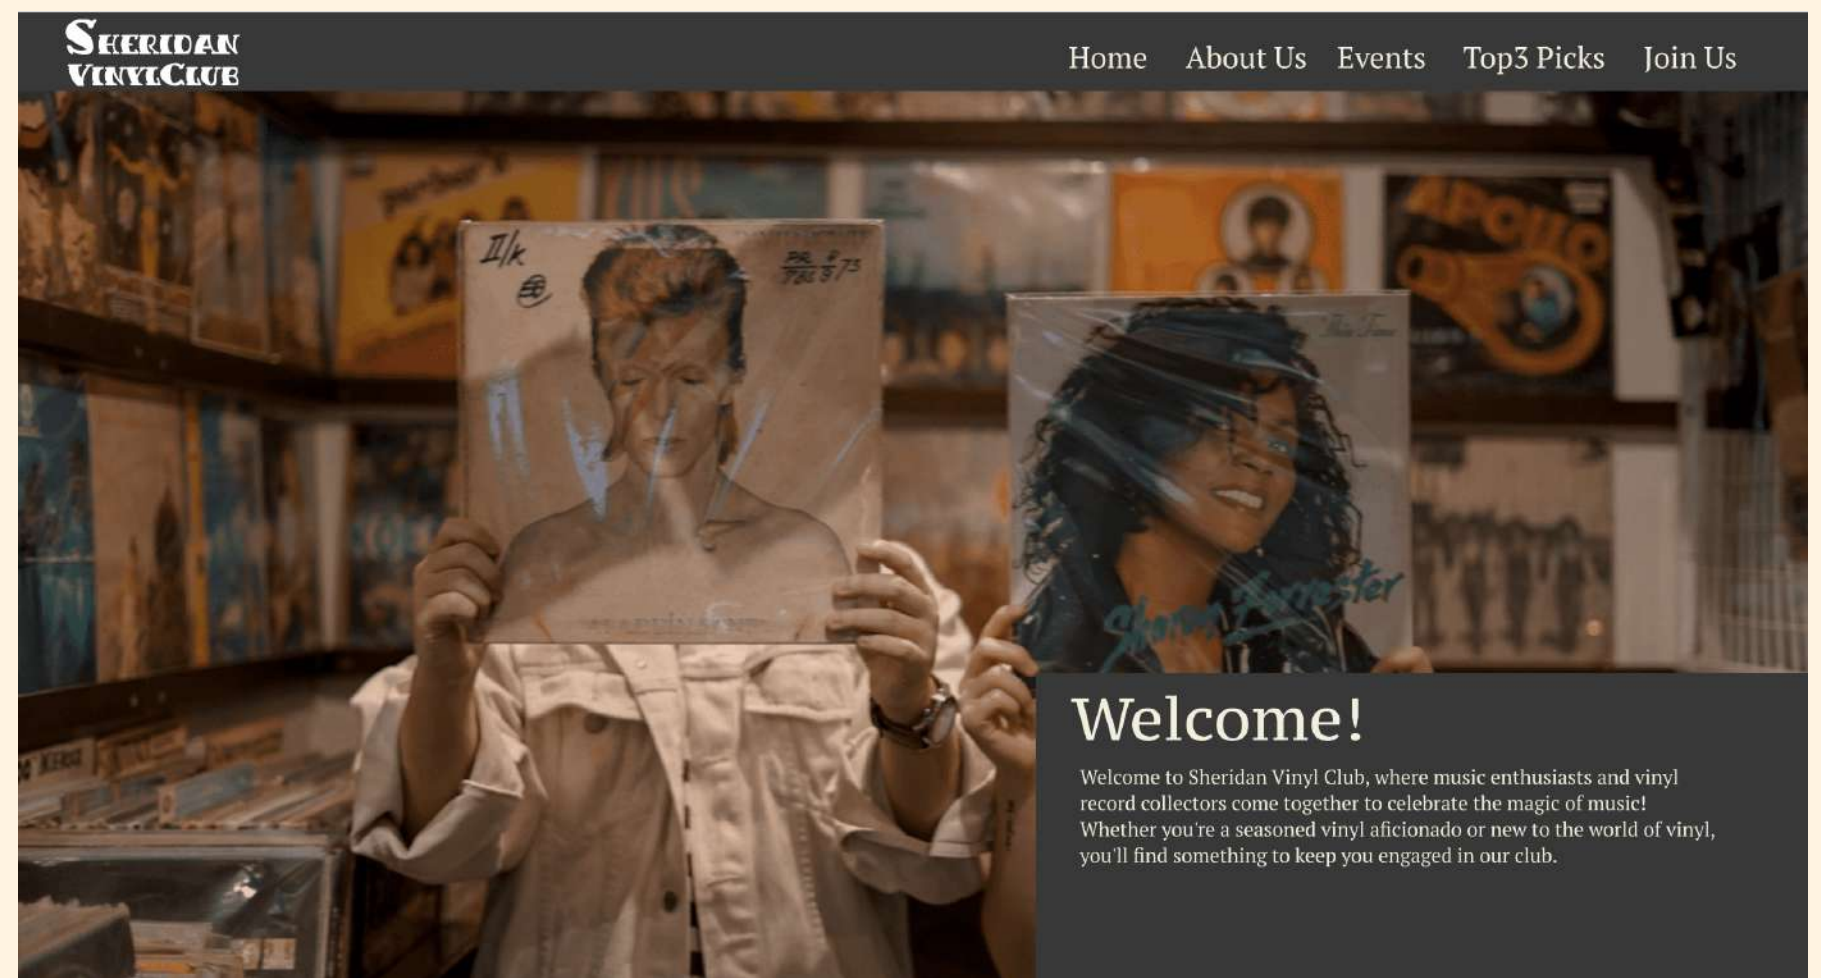

## Site web du Sheridan Vinyl Club

Sheridan College Vinyl Club, where aficionados and newcomers alike gather to celebrate the timeless allure of vinyl records. Immerse yourself in the world of vinyl as you explore, appreciate, and swap records with fellow members. Through a captivating collage-style design, this project harmonizes seamlessly with the theme, reflecting the eclectic nature of vinyl culture.

Le Sheridan College Vinyl Club, où les aficionados et les nouveaux venus se réunissent pour célébrer l'attrait intemporel des disques vinyles. Plongez dans le monde du vinyle en explorant, appréciant et échangeant des disques avec les autres membres. Grâce à un style de collage captivant, ce projet s'harmonise parfaitement avec le thème, reflétant la nature éclectique de la culture du vinyle.

Infrared sensor ensures dryer won't turn on while cat is in litter box	Soft-Close Litter Box Lid	Whole cat litter box with soundproof material	Surrounded Dryer
AI Scale at the bottom	Monitoring cat's bowel movement frequency	Monitoring cat's bowel movement time	Vibration Dehumidification

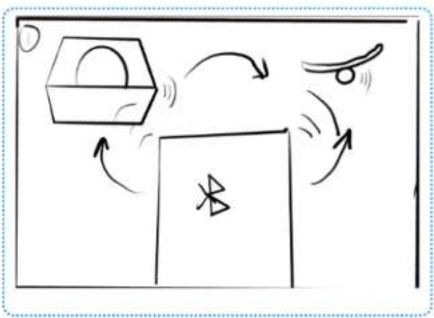

Utilizing the Double Diamond design process, I embarked on designing a model for a Smart Litter Box, tailored to meet the needs of modern pet owners.

Through meticulous exploration and iteration, I delved into storyboarding, prototyping, and mockup creation to develop a comprehensive design concept.

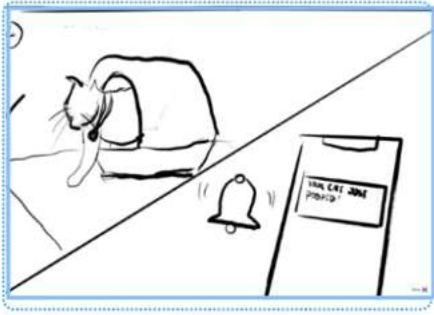

This journey enabled me to craft a user-centric solution that seamlessly integrates technology with pet care.

En utilisant le processus de conception Double Diamond, je me suis lancé dans la conception d'un modèle de litière intelligente, adapté aux besoins des propriétaires modernes d'animaux de compagnie. Grâce à une exploration et une itération méticuleuses, je me suis plongé dans le story-board, le prototypage et la création de maquettes pour développer un concept de design complet.

Ce parcours m'a permis de concevoir une solution centrée sur l'utilisateur qui intègre de manière transparente la technologie et les soins aux animaux de compagnie.

Connect the mobile devices to AI devices (AI cat litter box & AI Collars)

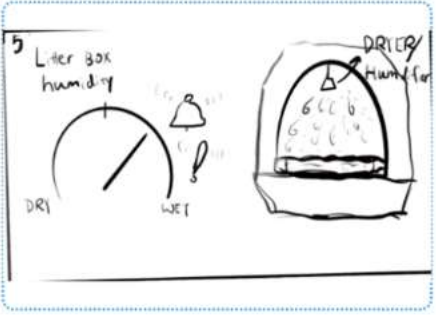

The mobile device will receive a notification when the cat uses the litter box.

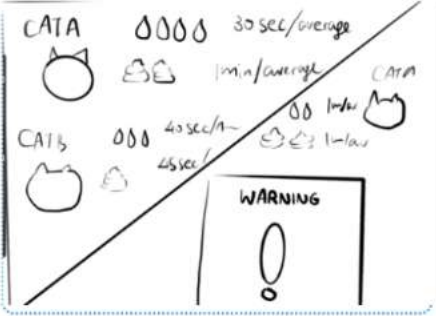

Multiple cats can be entered and monitored separately on a mobile device.

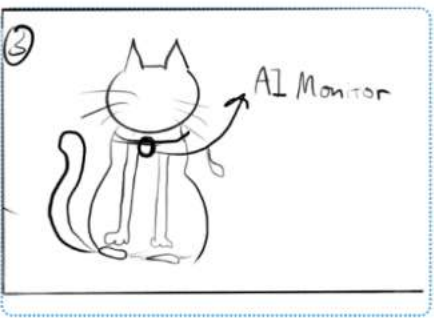

Type in basic information of the cat(s).

When the humidity of the litter box is monitored to be too high or too low, the dryer and humidifier in the litter box will automatically start working to adjust the environment in the litter box.

AI monitors for abnormal bowel movements (changes in frequency, changes in time spent toileting) and sends out health warnings.

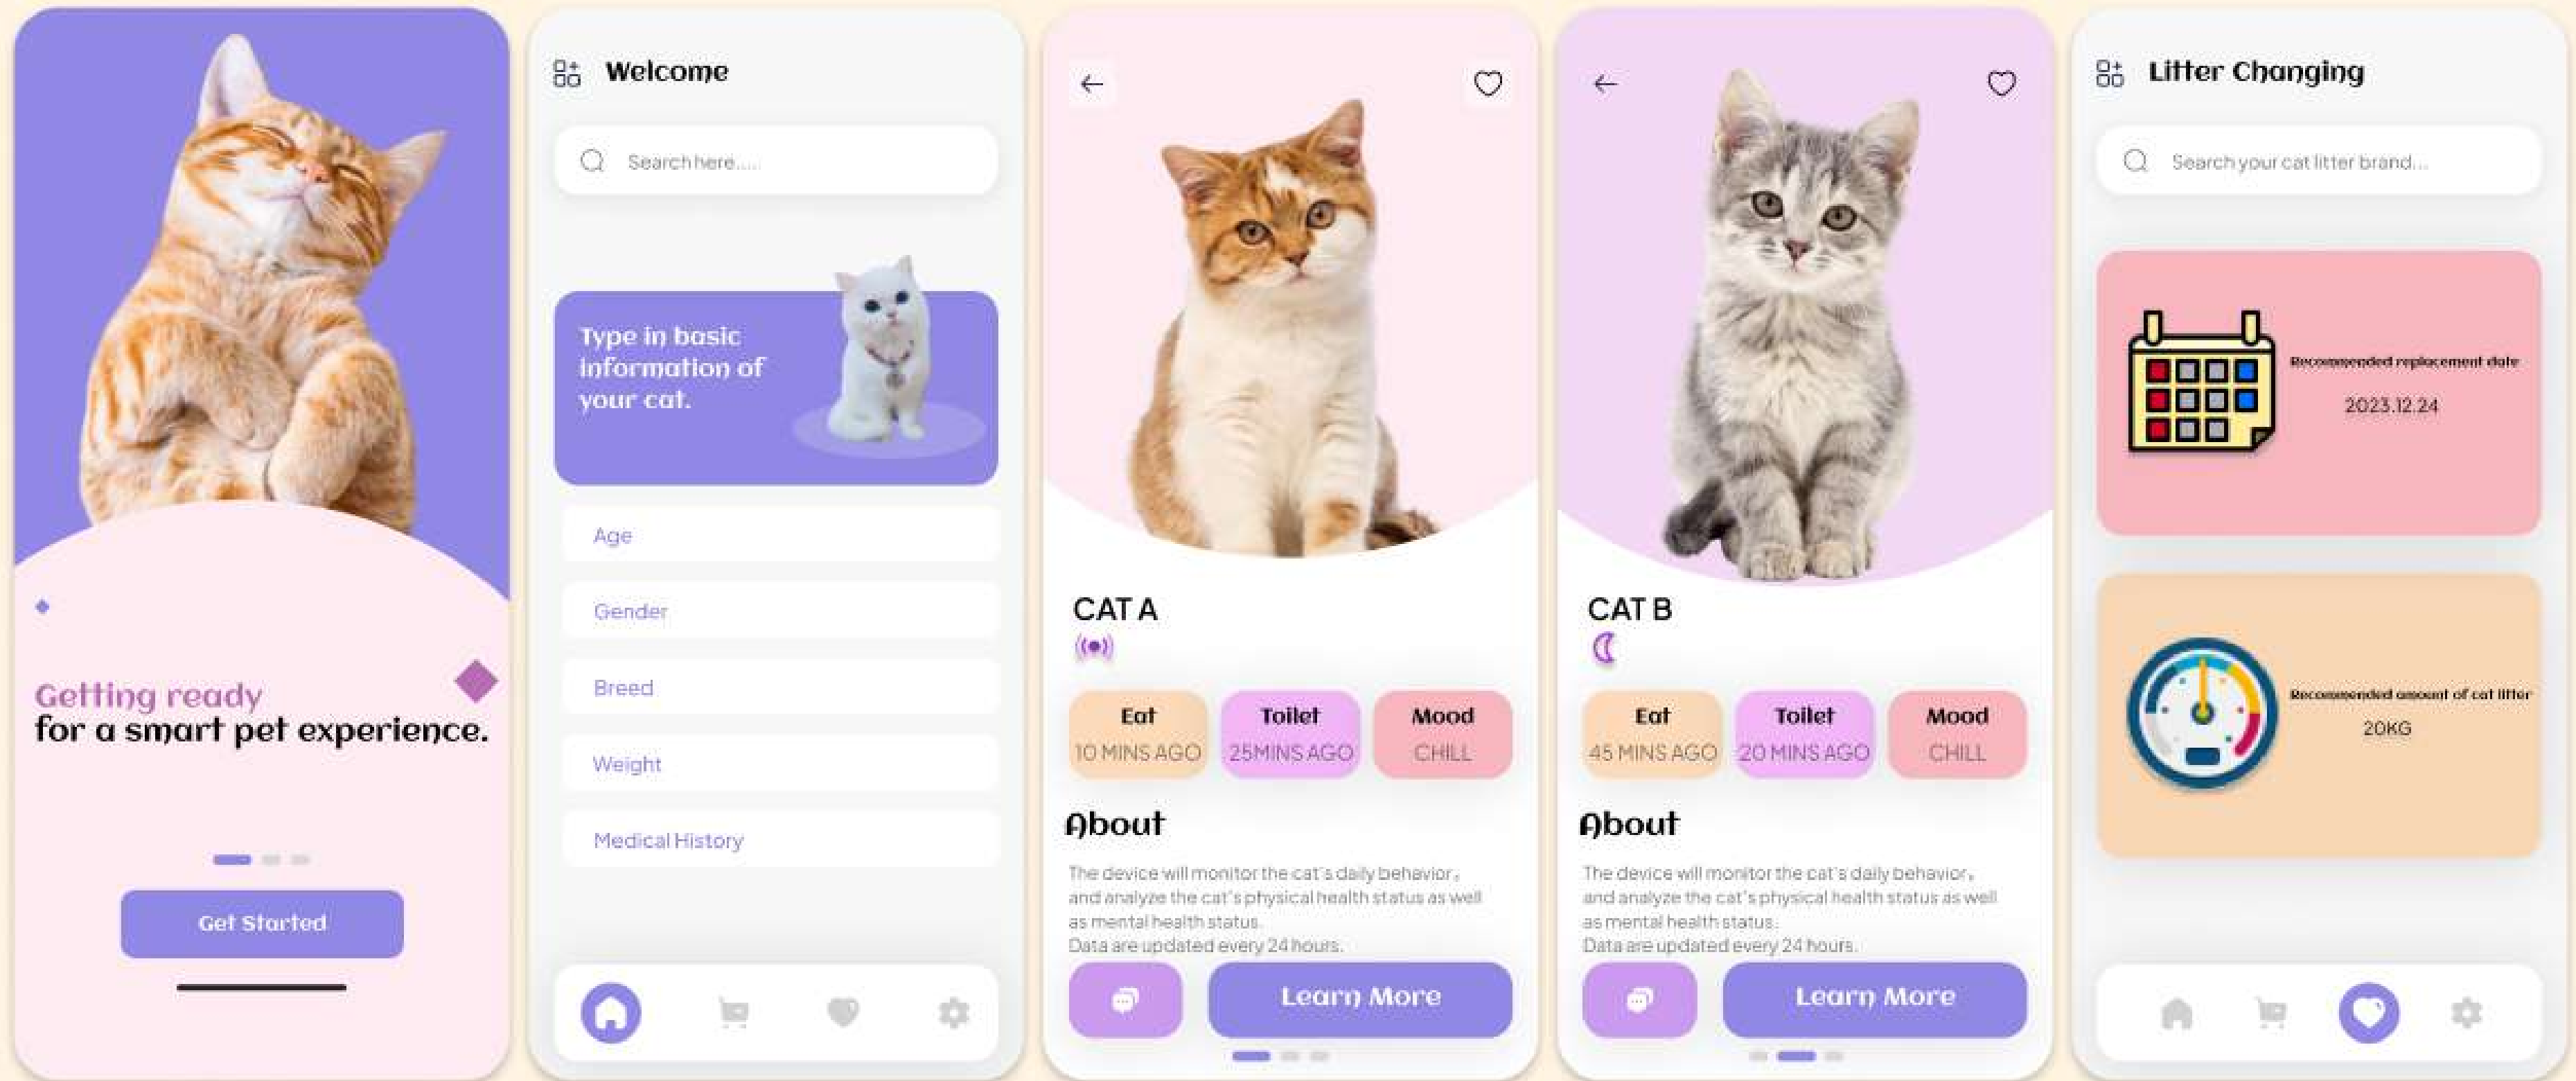

Put an AI monitoring collar on your cat.

The AI will calculate the proper time to change the litter as well as the recommended type of litter and amount of litter to use

Users receive a monthly cat health assessment form and feeding advice.

Spotlights : Figma (Design system, Components), Double Diamond design process

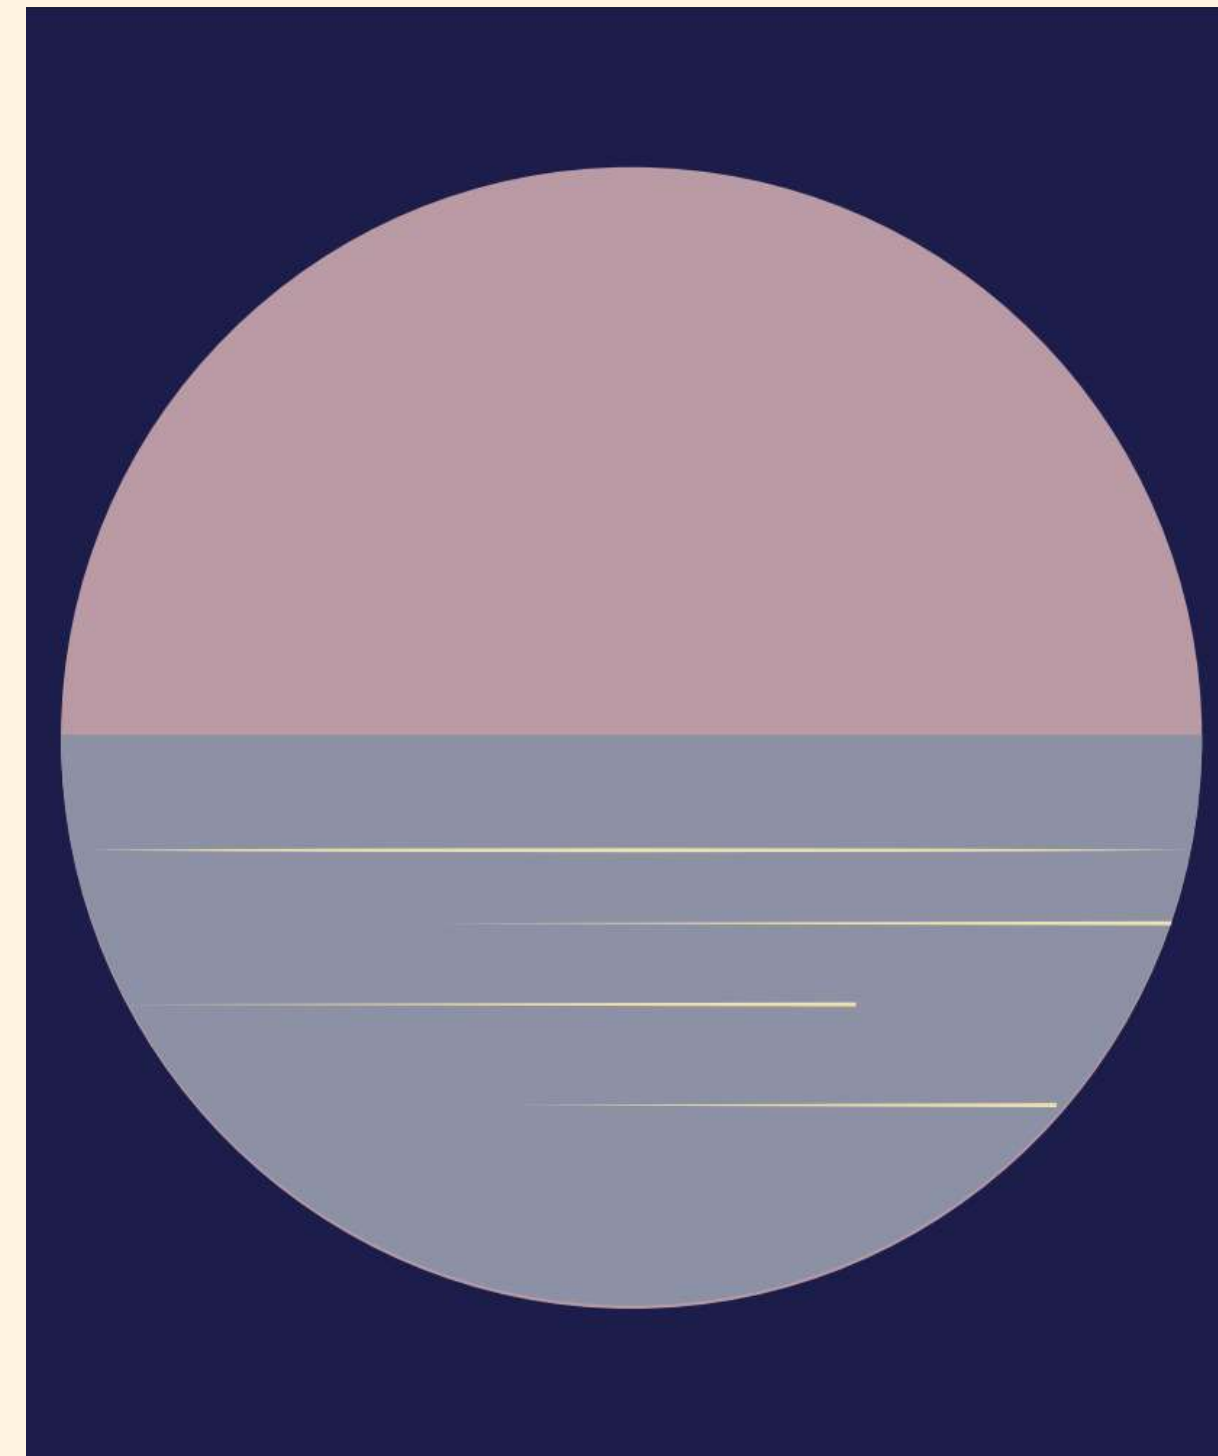

# Poster design: Opposing emotions

## Conception d'une affiche : Des émotions opposées

How do you show opposites using only geometric shapes? I brought myself into two opposite emotions and visualized their shapes, resulting in an impressive effect. This design was selected and exhibited at the campus.

Comment montrer les contraires en utilisant uniquement des formes géométriques ? Je me suis plongé dans deux émotions opposées et j'ai visualisé leurs formes, ce qui a produit un effet impressionnant. Ce dessin a été sélectionné et exposé sur le campus.

# Advertising Poster Design

## Conception d'affiches publicitaires

As an advertising designer, I have participated in the National Advertising Design Competition for College Students. Now presented are some of my award-winning designs.

En tant que concepteur publicitaire, j'ai participé au concours national de conception publicitaire pour les étudiants. Voici quelques-unes de mes créations primées.

Spotlights : Adobe Illustrator, prize-winning

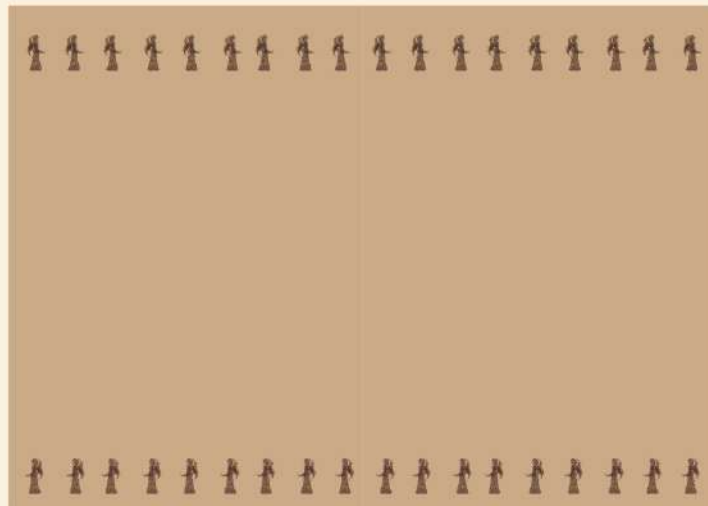

# "The Magic of Shadows" Book Design

## "La magie des ombres" Conception du livre

"The Magic of Shadows" is a captivating book that unveils the rich tradition of Chinese shadow puppetry. Drawing inspiration from traditional Chinese calligraphy and color schemes, this project offers a vibrant journey into the captivating world of this ancient art form.

"La magie des ombres" est un livre captivant qui dévoile la riche tradition des ombres chinoises. S'inspirant de la calligraphie traditionnelle chinoise et des jeux de couleurs, ce projet offre un voyage vibrant dans le monde captivant de cette forme d'art ancienne.

Spotlights : Adobe Illustrator, Typography Design
